Conference Organisers

The conference is organised by three partner institutions:

Faculty of Management is a member of the University of Primorska. It is a higher education institution for education and research in the fields of social sciences and business management, with a stress on management, which has interdisciplinary links to economic, business, legal, organisational and behavioural sciences. In addition to education and research, the basic activities of the faculty are providing consultancy to companies and other organisations, publishing and library activities, and organisation of international conferences. Management International Conference (MIC) is a traditional conference of this faculty for scholars of management studies, welcoming participants from around the world, with broad and diverse research interests. Its aim is to present and discuss research that contributes to the sharing of new theoretical, methodological and empirical knowledge, and to better understanding of management practices.

Eastern European Economics publishes original research on the newly emerging economies of Central and Eastern Europe, with coverage of the ongoing processes of transition to market economics in different countries, their integration into the broader European and global economies, and the ramifications of the 2008–9 financial crisis.

Society for the Study of Emerging Markets was founded to promote research and publication about emerging market economies and to provide a way for academics, policy makers, and members of the business community to exchange views and share information and research about emerging markets. The Society sponsors the journal *Emerging Markets Finance and Trade* (EMFT), which is recognized worldwide for the quality and timeliness of the research on emerging markets that it publishes. The Society also cooperates with its regional affiliates and allied organizations in other countries to promote its objectives, and holds international meetings and conferences that are devoted to issues relevant to emerging markets, many organized in cooperation with leading universities and research institutions as well as with regional partners.

Welcome Address by the Organizers

We have great pleasure and honour in welcoming you to Portorož, Slovenia, to participate in the Management International Conference (MIC) 2015.

This year, the traditional MIC conference is organized as a Joint International Conference. The participating institutions are University of Primorska, Faculty of Management, (Slovenia), Eastern European Economics (USA), and Society for the Study of Emerging Markets (USA).

We would like to extend a sincere thank to all the participants and presenters for their contributions and participation. This year, we received 157 submissions and selected the best 129 papers from authors from 29 countries, and the total number of participants will reach 200 (together with panel discussions and workshops).

All abstracts of papers are included in the Book of Abstracts. Authors are invited to submit full papers to the supporting journals (Borsa Istanbul Review, Comparative Economic Studies, Eastern European Economics, Economic Systems, Emerging Markets Finance and Trade, International Journal of Sustainable Economy, Management, and Managing Global Transitions) or to the Conference Proceedings.

Our deepest gratitude and a very warm welcome go to the keynote speaker, Prof. Dr. Dean Fantazzini from Moscow School of Economics, Moscow State University, Russian Federation.

Our warm welcomes go also to:

- the participants of the panel discussion on COMPETE project 'Mark up in Food Value Chains' which is based on research project supported by the European Commission's Seventh Framework Programme,
- the participants of the workshop 'Innovative and Creative Ways to Enhance Teaching and Learning' which is based on learning techniques that have been developed by members of the international MirandaNet Fellowship,
- the editors of the supporting journals, and
- to PhD students who will participate at the Doctoral Students' Workshop.

Last but not least, we extend our sincere thanks to everybody who participated in the programme boards and organisation of MIC 2015.

We wish each of you a very successful conference.

Dr. Egon Žižmond
Conference Director

Conference Aims and Subject Areas

At the end of the 20th century the sustainability concept was mainly a basis for developing policies consistent with a continued use of resources into the future without causing environmental crisis. But the situation has evolved, and the global economic crisis in 2009 was the ultimate consequence of short-term economic thinking. We need a new form of economic development, addressing the needs of the present without undermining the needs of the future. Sustainable development requires us to take a long term view of the economy, rather than adopting short term fixes.

A concept of sustainability includes sustainable economic growth and development, economic stability, competitiveness, healthy environment and sound environmental practices, an innovative and knowledge-based economy, income security and employment stability, as well as respect of cultural experiences of societies.

The aim of the conference Managing Sustainable Growth is to analyse various aspects of sustainable economic growth and development and to offer researchers and professionals the opportunity to discuss the most demanding other issues of sustainability.

The conference will be carried out in three tracks:

- MIC Track (traditional Management International Conference, organised by University of Primorska, Faculty of Management)
- Economics Track (organised by Eastern European Economics)
- Finance Track (organised by Society for the Study of Emerging Markets)

Energy Price Shocks and Economic Growth: What the Academic Literature Says, Current Situation and Future Prospects

Friday, 29 May 2015 • 9:30–11:00 • Aurora

Keynote Speaker

Dr. Dean Fantazzini, Moscow School of Economics,
Moscow State University, Russian Federation

The economic literature has proposed several models to explain the inverse relationship between energy price movements and economic activity: the most common is the so-called supply-side channel of transmission where rising oil prices are indicative of the reduced availability of a basic input to production. Other models include income transfers from the oil-importing nations to the oil-exporting nations, real balance effects and monetary policy. The supply-side channel was generally considered the best explanation of why rising oil prices slows GDP growth and stimulates inflation. However, these models lacked empirical support and were unable to explain a large share of business cycle fluctuations in real GDP. Moreover, they suppose that oil prices are exogenous, which is fairly unrealistic.

As a response to these issues, another branch of the literature suggested that the primary channel of transmission is the demand side of the economy, where the focus is on the reduction in the demand for goods and services triggered by energy price shocks. Discretionary income effects, uncertainty effects on investments decisions, precautionary savings and capital reallocation costs have been proposed to explain the demand channel of transmission. Besides, there is an increasing debate whether there is an asymmetric relationship between energy prices and economic activity. Furthermore, although this relationship seemed fairly robust and well understood by the early 1990s, it seemed to have weakened in the late 1990s and early 2000s.

The global financial crisis which has started in 2007 has shaken several previous established ideas about the relationship between energy prices and economic growth and it has sparked a renewed interest in this research field. In this regard, Kilian and his co-authors in a series of articles published since 2008 showed that ‘an energy price increase driven by strong global demand for industrial commodities (including crude oil), for example, may have far less adverse consequences for real output than the same energy price increase driven by adverse global oil supply shocks or by expectations-driven shocks to the precautionary demand for oil.’ Thus, the origin of energy price shock matters. In general, this new field of the economic literature found that the economy experienced a decline in the total impact from energy supply shocks. Similarly, the negative total impact of aggregate demand shocks on GDP growth rates declined during the nineteenth century, but economy appears to have become more sensitive with the transition to oil in the mid twentieth century. Interestingly, the major reason why the economy has been less affected by supply and demand shocks since Second World War is simply that, apart from the price hike in 1980 and more modestly between 2006 and 2008, the shocks themselves have decreased significantly in strength.

This brings us to the oil price crash in 2014, which has attracted a lot of attention

worldwide. The reasons behind this crash in 2014 are not yet fully clear, but four main reasons have been identified: excess supply (OPEC, US shale oil); excess expected demand (that is lower real demand from Europe and Asia); a strong dollar (end of the Quantitative Easing program and good economic fundamentals); a (negative) financial bubble in oil prices in the last months of 2014. The last suggested reason is novel and will be discussed using some recent tests for multiple bubbles proposed in economics and physics. The fact that the existence of a negative bubble in oil prices is supported by tests developed in different research fields suggests that this finding is fairly robust.

The presentation will then focus on the future prospects of world economy, first focusing on the factors that might affect the growth impact in 2015–6, and secondly on inflation, fiscal policy implications, monetary policy and structural policies implications. Finally, I will consider future prospects in the medium-long term, dealing with energy transition risks, government risks and business risks.

Doctoral Students' Workshop

Friday, 29 May 2015 • 14:00–17:15 • Daphnia

Workshop Chairs

Dr. Štefan Bojnec, University of Primorska, Faculty of Management, Slovenia
Dr. Ali Kutan, Southern Illinois University, USA

Doctoral Students' Workshop provides an opportunity for doctoral students, young researchers and postdocs to gain new knowledge and skills on academic writing for publishing scientific papers in international journals. The workshop topics are:

- How to Write a Research Proposal • 14:00–15:30
Dr. Štefan Bojnec, University of Primorska, Faculty of Management, Slovenia
- How to Publish in Top Business and Economics Journals • 15:45–17:15
Dr. Ali Kutan, Southern Illinois University, USA

Innovative and Creative Ways to Enhance Teaching and Learning

Friday, 29 May 2015 • 14:00–15:30 • Pharos

Workshop Chairs

Dr. Christina Preston and Dr. Sarah Younie, MirandaNet, United Kingdom

This workshop is based on learning techniques that have been developed by members of the international MirandaNet Fellowship (www.mirandanet.ac.uk), a network of practitioners who share ideas on pedagogical practice across national boundaries. We will encourage exploration of how to develop learning strategies that are student-centred, personalised, active, collaborative, and dialogical. We will also demonstrate how to integrate into traditional teaching classroom extension techniques like microblogging, social networking, concept mapping, dialogic and collaborative knowledge creation activities.

Compete Project: Mark up in Food Value Chains

Saturday, 30 May 2015 • 9:00–18:00 • Nautilus

Panel Discussion Chairs

Dr. Heinrich Hockmann, IAMO, Germany

Dr. Štefan Bojnec, University of Primorska, Faculty of Management, Slovenia

Compete project 'International Comparisons of Product Supply Chains in the Agro-Food Sectors: Determinants of Their Competitiveness and Performance on EU and International Markets' is a research project supported by the European Commission's Seventh Framework Programme for research, technological development and demonstration under grant agreement No. 312029. The project runs over the three-year period 2012–5. The project will deliver a coherent and innovative evaluation of competitiveness of European food chains by integrating various new approaches. Based on this, the research results allow to deduce a congruent, coherent and consistent set of policy recommendations aiming at improving competitiveness and promoting the Knowledge Based Bio-Economy in Europe. The Compete project consortium is composed of 16 partners from 10 European countries and brings together academics, trade bodies, industry representative advisory body and agricultural cooperatives.

Representatives of Compete project consortium partners will present and discuss their research results.

Editors' Panel

Saturday, 30 May 2015 • 12:30–13:15 • Daphnia

Panel Chair

Dr. Egon Žižmond, University of Primorska, Faculty of Management, Slovenia

Eight international journals will be presented:

- *Borsa Istanbul Review*, Editor Dr. Ali Kutan
- *Comparative Economic Studies*, Editor Dr. Josef Brada
